We are specialized in making Automatic Boiler

What is the use of an automatic boiler?

It is a fully automatic steam boiler that produces steam quickly up to 56.89 psi in 7 minutes. Based on steam pressure, the burner will automatically stabilize and control the water usage.

Installation of one automatic boiler produces steam to the idly box, rice cooker, sambar hot case and bain-marie to cook the food faster.

Benefits :

- Save gas and water
- Less Maintenance
- One switch process
- Auto-Sensing
- Cook food faster
- Auto Stabilization

Safety:

- Burner ignites only when there is water flow, so it protects from causing any severe harm.
- Safety value helps to release the steam in case of emergency.
